COURSE MATERIALS

UNIT 1- INTRODUCTION

TOPIC : PYTHON INTERPERTER AND INTERACTIVE MODE.

INTRODUCTION TO PYTHON:

- *Python is a general-purpose interpreted, interactive, object-oriented, and high-level programming language.*
 - It was created by Guido van Rossum during 1985- 1990.
 - Python got its name from “Monty Python’s flying circus”. Python was released in the year 2000.
- ❖ **Python is interpreted:** Python is processed at runtime by the interpreter. You do not need to compile your program before executing it.
-
- ❖ **Python is Interactive:** You can actually sit at a Python prompt and interact with the interpreter directly to write your programs.
-
- ❖ **Python is Object-Oriented:** Python supports Object-Oriented style or technique of programming that encapsulates code within objects.
-
- ❖ **Python is a Beginner's Language:** Python is a great language for the beginner-level programmers and supports the development of a wide range of applications.

Python Features:

- ❖ **Easy-to-learn:** Python is clearly defined and easily readable. The structure of the program is very simple. It uses few keywords.
- ❖ **Easy-to-maintain:** Python's source code is fairly easy-to-maintain.
-

❖ **Portable:** Python can run on a wide variety of hardware platforms and has the same interface on all platforms.

.

❖ **Interpreted:** Python is processed at runtime by the interpreter. So, there is no need to compile a program before executing it. You can simply run the program.

.

❖ **Extensible:** Programmers can embed python within their C,C++,Java script ,ActiveX, etc.

.

❖ **Free and Open Source:** Anyone can freely distribute it, read the source code, and edit it.

.

❖ **High Level Language:** When writing programs, programmers concentrate on solutions of the current problem, no need to worry about the low level details.

.

❖ **Scalable:** Python provides a better structure and support for large programs than shell scripting.

Applications

- ❖ Bit Torrent file sharing
- ❖ Google search engine, Youtube
- ❖ Intel, Cisco, HP, IBM
- ❖ i-Robot
- ❖ NASA
- ❖ Facebook, Drop box

-

Python interpreter:

Interpreter: To execute a program in a high-level language by translating it one line at a time.

Compiler: To translate a program written in a high-level language into a low-level language all at once, in preparation for later execution.

Compiler	Interpreter
Compiler Takes Entire program as input	Interpreter Takes Single instruction as input
Intermediate Object Code is Generated	No Intermediate Object Code is Generated
Conditional Control Statements are Executed faster	Conditional Control Statements are Executed slower
Memory Requirement is More (Since Object Code is Generated)	Memory Requirement is Less
Program need not be compiled every time	Every time higher level program is converted into lower level program
Errors are displayed after entire program is checked	Errors are displayed for every instruction interpreted (if any)
Example : C Compiler	Example : PYTHON

MODES OF PYTHON INTERPRETER:

Python Interpreter is a program that reads and executes Python code. It uses 2 modes of Execution.

1. Interactive mode
2. Script mode

1. Interactive mode:

-
- ❖ Interactive Mode, as the name suggests, allows us to interact with OS.
- ❖ When we type Python statement, **interpreter displays the result(s) immediately.**
- .

Advantages:

- ❖ Python, in interactive mode, is good enough to learn, experiment or explore.
- ❖ Working in interactive mode is convenient for beginners and for testing small pieces of code.

Drawback:

- ❖ We cannot save the statements and have to retype all the statements once again to re-run them.

In interactive mode, you type Python programs and the interpreter displays the result:

```
>>> 1 + 1
2
```

The chevron, >>>, is the prompt the interpreter uses to indicate that it is ready for you to enter code. If you type 1 + 1, the interpreter replies 2.

```
>>> print('Hello, World!')
Hello, World!
```

This is an example of a print statement. It displays a result on the screen. In this case, the result is the words.
